

Spinnaker Contract Services Limited
Personnel Logistics

Environmental Policy Statement

It is the policy of Spinnaker Contract Services to manage all of its activities so as to give benefit to society, ensuring that they meet relevant laws and regulations, are acceptable to our customers and the community at large and that their environmental impact is reduced to a practicable minimum. In so doing, Spinnaker Contract Services will ensure compliance with its responsibilities under UK environmental legislation.

There are three areas in which we will positively influence environmental awareness and compliance:

- In support of our core activities, we will ensure that our process for procuring consumable supplies maximise the use of biodegradable fluids and sustainable raw materials, those that can be recycled and those that have already been recycled
- We will ensure that our process for disposing of all waste materials allow compliance with applicable legislation / duty of care obligations and maximise the possibility for the segregation of waste that can be recycled from that which can't
- Spinnaker Contract Services will maximise the efficiency of its use of consumed energy through the adoption of an efficient transport policy for its personnel and the control of the use of its electrical supplies and consumables at its premises

Spinnaker Contract Services shall:

- Encourage and promote best practice and continual improvement in environmental performance.
- Commit to the prevention of environmental pollution in relation to the impacts that Spinnaker Contract Services activities have on the environment.
- Set environment objectives and measure against these in relation to the aspects and impacts of the business.
- Provide information and assistance to ensure that materials are used, stored and disposed of in a safe and environmentally responsible manner.
- Promote the open exchange of environmental information with customers and suppliers.
- Provide appropriate environmental training where necessary.
- Comply with the requirements of its customer's environmental policies.
- Ensure efficient off-site disposal or re-use of waste materials.
- Assess the company activities in relation to the specific aspects on the environment.

This policy statement will be formally reviewed on an annual basis at the Management Review meeting.
